

Murat Öztürk

Mobile Developer | Android & iOS | Kotlin Multiplatform

İstanbul, Türkiye | +90 545 727 60 69 | hello@muratozturk.dev | linkedin.com/in/muratozturk5 | github.com/muratozturk5 | muratozturk.dev

SUMMARY

Mobile developer with 6+ years of experience building native Android (Kotlin, Jetpack Compose) and iOS (Swift, SwiftUI) apps and shipping Kotlin Multiplatform and Compose Multiplatform code to both stores. Published 13+ apps on Google Play and the App Store across POS, HR, transport and AI products, with App Store ratings of 4.5 and above. As a freelancer, delivered 60+ white-label AI app builds for 58 clients worldwide. Comfortable across the stack with Node.js, ASP.NET Core and PostgreSQL backends.

SKILLS

Programming languages: Kotlin, Java, Swift, TypeScript, JavaScript, C#, SQL

Android: Kotlin, Java, Jetpack Compose, XML Views, Coroutines, Flow, Hilt, Koin, Room, Retrofit, Ktor, Paging 3, Navigation, DataStore

iOS: Swift, SwiftUI, async/await, Core Location, StoreKit, RevenueCat

Multiplatform: Kotlin Multiplatform, Compose Multiplatform, Flutter, Electron, Capacitor

Architecture: MVVM, MVI, Clean Architecture, Multi-module, Dependency Injection

Backend & Web: Node.js, Express, NestJS, ASP.NET Core, REST APIs, SignalR, Socket.IO, PostgreSQL, Prisma, MSSQL, React, Next.js, TypeScript

AI & Services: OpenAI API, Google Gemini, Claude API, ElevenLabs, Replicate, Firebase, Google Play Billing, AdMob, Mapbox, ML Kit

Tooling: Git, GitHub, Docker, Coolify, Android Studio, Xcode, Swagger

EXPERIENCE

Mobile Developer (Android & iOS)

EasyHR AI Platform | İstanbul, Türkiye | May 2026 - Present

- Build the EasyHR AI Platform apps natively on Android (Kotlin, Jetpack Compose, Koin, Ktor, MVI) and iOS (SwiftUI): time and attendance, leave requests, approvals, candidates, org chart and a company social feed.
- Split the Android codebase into 13 feature modules on an MVI architecture so features stay isolated and can be developed in parallel.
- Implemented location-verified check-in and check-out with geofence region matching, BLE beacon, NFC and QR options and mock-location detection.
- Shipped both apps to Google Play and the App Store; live since July 2026.

Mobile Application Developer

Uris Tech (Uris Yazılım Teknolojileri A.Ş.) | İstanbul, Türkiye | Nov 2025 - Present

- Build Uris Pro, Uris Kids and Uris 360, a staff and school transport platform with passenger, driver and fleet manager roles; 1K+ installs and a 4.6/5 App Store rating.
- Developed the Android app in Jetpack Compose with Hilt, Retrofit and a multi-module MVI architecture.
- Built the native iOS app, including a location push extension for live vehicle tracking.
- Built the fleet manager panel with Compose Multiplatform and contributed 200+ commits to the ASP.NET Core backend.

Freelance Mobile Developer

Freelance | Remote | May 2021 - Present

- Built AI chat, image, video and music apps (ConversAI, VirtuAI, VideoAI, MusicAI) for Android (Kotlin, Jetpack Compose, Hilt, Room) and iOS (SwiftUI) and delivered 60+ white-label builds for 58 clients worldwide.
- Handled each client launch end to end: rebranding, Google Play Billing and RevenueCat paywalls, AdMob, store listings and backend setup.

- Wrote Node.js and Express proxy APIs for OpenAI, RunwayML and Suno with Joi validation and Swagger documentation.
- Launched KidAI: Storytime Magic, an AI story app for children with one Compose Multiplatform codebase for Android and iOS and an Express and PostgreSQL backend using Gemini and ElevenLabs.
- Built APF: Auto Part Finder, a B2B desktop and mobile system for auto parts shops (Electron, React, TypeScript, PostgreSQL, Capacitor) with 59 supplier integrations, VIN lookup and e-invoicing; live on both stores.
- Built generate.tr, a seven-app studio platform (React, TypeScript, Express, Prisma, PostgreSQL) with single sign-on across subdomains and 35 languages.

Full Stack Developer

Liwa Yazılım (Liwa Soft) | İstanbul, Türkiye | May 2020 - Nov 2025

- Built and maintained Samba Patron (Samba Boss), the owner reporting app for SambaPOS restaurants, on Android (Kotlin, later rewritten in Jetpack Compose) and iOS (SwiftUI); a 4.5/5 rating from 91 App Store reviews and 1K+ Google Play installs.
- Developed the Samba Garson waiter app in Java and migrated it to Kotlin Multiplatform and Compose Multiplatform as Samba Mobile, shipping the first iOS version from the shared codebase.
- Built Samba Mutfak, a Kotlin kitchen display app, and real-time order and table updates over SignalR.
- Worked on Pentegrasyon, a WPF desktop integration that connects restaurant POS systems with online food marketplaces, and its courier app.
- Published and maintained apps on Google Play and the App Store under the company accounts from 2021.

PROJECTS

Mova

Open source Android app | github.com/muratozturk5/Mova | 2023

- Built a TMDb movie and series app with MVVM, Clean Architecture, Hilt, Room, Paging 3 and Retrofit; 150+ GitHub stars, 20+ forks and 500+ Google Play installs.

OpenAI DALL·E 2 Android Client

Open source | github.com/muratozturk5/OpenAI-Dall-E-2 | 2022

- Built a native Kotlin client for the DALL·E image API with Clean Architecture, Coroutines, Flow, Hilt and Retrofit; 60+ GitHub stars.

Open source contributions

github.com/vorssaint/vorssaint-utils | 2026

- Merged two pull requests into vorssaint-utils, a 30k-star open source macOS menu bar toolkit written in Swift.

EDUCATION

Bachelor's degree, Management Information Systems

Osmaniye Korkut Ata University | 2017 - 2021 | GPA: 3.43 / 4.00

LANGUAGES

Turkish (Native), English (Professional working proficiency)
